IMED 1316 Web Page Design 1

9-2004

Student's Name: _____

Date Due: _____ Time Spent _____ Grade: _____

Assignment: Project Presentation

DIRECTIONS:

Make a project presentation finder as if you were making it for a client. You will do this for every web site you develop. It will include graphical user interfaces (GUIs), a time line chart for the project from beginning to end, and interactivity flow chart printed as color document sheets to go into the folder. The GUIs will be converted later into web page screens and the flow chart will become an interactive site map page.

First draw sketches of **graphical user interface** ideas for your assignment web site on paper. Your instructor will give you the assignment for the web site. Show your are and discuss with your instructor and select the best design. Then proceed to producing the interfaces in Adobe PhotoShop in the proper sizes. Save your PhotoShop files as **.jpeg** files.

Also draw the **flowchart** for interconnectivity of the web site pages first as sketches on paper. Then after showing and discussing the flowchart with the instructor, create in color using Adobe Illustrator and save as **.ai** files.

PRESENTATION:

Print out the interfaces from Adobe Photoshop and your flow chart from Adobe Illustrator in color on 8 1/2" X 11" paper and insert them into the presentation (term paper style) binder.

Fill out this assignment sheet, including hours invested, and slip it loose into the front of the binder. Turn in the project presentation binder to the instructor on or before the due date.
